OBJECTIVE

Dynamic and results-driven software developer with a robust foundation in front-end and back-end technologies, including HTML, CSS, JavaScript, Python, Node.js, ReactJS, and SQL. Proven expertise in managing integrations and software implementations while automating and streamlining operations to enhance efficiency and reliability. Committed to continuous learning and delivering scalable, user-focused solutions that drive innovation in software projects. Recognized for a collaborative approach, adaptability, and a strong focus on achieving impactful results in fast-paced environments.

EXPERIENCE

eCommerce DevOps Engineer

08/2025 – Present
Remote

Sarnova

- Manage and support multiple eCommerce platforms (WooCommerce, Magento, Shift4), ensuring site stability, accurate product data, and seamless user experiences across all storefronts
- Design and implement custom system integrations and automation workflows to connect internal platforms, third-party services, and APIs, improving operational efficiency and data consistency across systems
- Collaborate with designers and stakeholders to implement frontend components (HTML, CSS, JavaScript), including full homepage redesigns and revenue-driving landing pages
- Develop and maintain custom PHP applications and features to extend platform functionality, enhance usability, and streamline internal operations
- Administer AWS infrastructure and serverless solutions, including EC2 and Lambda, to support application hosting, implement custom business logic, automate workflows, and improve the scalability and reliability of eCommerce systems
- Utilize GitHub for version control and collaborative development, ensuring clean deployment processes and efficient code reviews
- Work with tools such as VS Code, phpMyAdmin (SQL), Trello, Jira, and Figma to support end-to-end project delivery, from planning to deployment
- Monitor platform performance and implement continuous updates to improve stability, user experience, and security compliance

Marketing, Technology and Operations Specialist

04/2023 – 08/2025
Miramar, FL

One Beat Medical

- Manage all integrations and new software implementations.
- Utilize innovative problem-solving techniques to address any systems or reporting challenges within the company, ensuring efficient workflows and optimal solutions.
- Manage NetSuite ERP and HubSpot CRM system administration responsibilities, ensuring optimal functionality and efficiency.
- Create and manage website content including new products, product descriptions, landing pages, and email newsletters.
- Create detailed reports analyzing campaign performance and business operations against set objectives.
- Develop and implement successful digital marketing campaigns to increase brand awareness and customer engagement.
- Coordinated and managed open projects for a digital marketing team, maintaining detailed notes to track progress and ensure success, while leveraging Trello to organize tasks effectively.

Biomedical Engineer

One Beat Medical

05/2019 – 04/2023

Miramar, FL

- Inspected, tested, and repaired Automated External Devices (AEDs).
